

GENARO-CEDRIC NISUS

AI / ML ENGINEER

Suresnes (92, France) / +33 6 98 45 02 89 / gc.nisus@outlook.fr / linkedin.com/in/gcnisus / github.com/Gnaro-Shaft / gcn-data.fr

PROFILE

AI / ML Engineer with **7+ years** in mission-critical technical environments (C2S Bouygues / TF1). I build production-grade AI systems: a **self-hosted RAG evaluated at 90% precision** (Mnemo), a **multi-agent AI assistant** (Jarvis Local), and a **crypto trading bot with an ML filter** deployed 24/7 (Hyperliquid V8). Certified web/mobile development project manager (La Capsule, RNCP level 6). Focus on finance and crypto. Seeking an AI / ML Engineering role where my system-debugging instinct and continuous-improvement drive make the difference.

AI PROJECTS

Mnemo — Self-hosted RAG for Obsidian vault

2024 — Present

Python · FastAPI · Qdrant · Embeddings bge-m3 · Docker Compose

- Full production RAG system: incremental ingestion, chunking, embeddings, semantic search via Qdrant
- A/B tested embedding models: **Hit@1 lifted from 30% (nomic-embed-text) to 90% (bge-m3)** on a 20-query validation benchmark
- Complete dockerized pipeline (FastAPI + Qdrant + ingestion worker), deployed locally
- Technical write-up published on the gcn-data.fr blog

Jarvis Local — Multi-agent AI assistant

2024 — Present

Python · Claude API · Multi-agent orchestration · MCP

- Personal multi-agent assistant: vault search, note-taking, email summarization, planning
- Orchestrates specialized Claude agents via MCP (Model Context Protocol)
- Integrates Obsidian, Gmail, calendar and Mnemo RAG

Hyperliquid Trading Bot V8 — ML-driven crypto trading bot

2024 — Present

Python · scikit-learn · MongoDB · WebSocket · Fly.io

- Crypto trading bot (Hyperliquid) deployed **24/7 on Fly.io**
- Multi-timeframe scoring filtered by an ML model with automatic 6-hour retraining**: champion/challenger pattern, holdout validation, anti-regression guard
- Risk management: exposure caps, circuit breaker, BTC/SOL correlation gate
- Realistic backtests (spread, slippage, latency) + automated weekly audit
- Observability: structured decision logs (Mongo) + heartbeat, personal React dashboard

GCN Data — Full-stack portfolio + dashboard

2022 — Present

Node.js · Express · MongoDB Atlas · React · Fly.io

- Full-stack portfolio and admin dashboard: gcn-data.fr
- REST API with JWT auth (rotation + replay defense) + **145 integration tests**
- Blog AI Agent: article generation via Claude Sonnet 4.5, weekly auto-publish to LinkedIn
- Weekly Lighthouse monitoring, private analytics, image upload via Cloudinary

PROFESSIONAL EXPERIENCE

IT & Mobile Technician

June 2018 — Present

C2S Bouygues (assigned to TF1) — Boulogne-Billancourt, France

- Handled and resolved **30+ incidents/day** (hardware, software, network) via ITSM ticketing, **L1 resolution rate > 85%**
- Data-driven approach**: analyzed incident trends to surface recurring issues and propose process improvements
- Trained and supervised a 5-person technician team, produced technical documentation and standardized procedures
- Managed Active Directory, workstation deployment, permissions and IT security
- Key reflex transferred to AI engineering**: dissect a system, trace a flow back to its root cause, never give up until it works

Helpdesk Technician Eiffage — La Défense, France	2017 — 2018
▶ L2 technical support for 500+ users : diagnosis, resolution and escalation of incidents in an ITIL environment	
Customer Advisor Bouygues Telecom — France	2007 — 2017
▶ Managed a portfolio of 200+ B2B/B2C clients : needs analysis, technical advisory, KPI tracking	
▶ Team management: coordination, meeting facilitation, performance monitoring	

■ EDUCATION

Web & Mobile Application Development Project Manager La Capsule — RNCP Level 6 (Bachelor's equivalent) Intensive full-stack training: JavaScript, React, Node.js, MongoDB, Agile/Scrum methodologies	Oct. — Dec. 2021
IT Systems & Networks Technician GEFI — Professional Certification Level 5 (Associate's equivalent) Systems architecture, TCP/IP networks, IT security, Windows Server & Linux administration	2017

■ CERTIFICATIONS & CONTINUING EDUCATION

- ▶ **Applied Machine Learning** — scikit-learn, feature engineering, holdout validation (via Bot V8 project, 2024–present)
- ▶ **RAG & Embeddings** — A/B testing bge-m3 vs nomic-embed-text, Qdrant in production (via Mnemo project, 2024–present)
- ▶ **Claude / Anthropic API** — production integration, prompt engineering, MCP (2024–present)
- ▶ **Python for Data Science** — Pandas, EDA, data pipelines (self-taught, 2023–present)
- ▶ **ITIL Foundation** — IT service management methodologies
